Experience

Accenture — March 2024 - Present
Senior Full Stack Developer · Saragossa, Spain · Hybrid

- Evolved a 50+ component library used by 5+ development teams for Iberdrola's internal and corporate applications, improving reusability, scalability, and consistency.
- Standardized documentation with Storybook and contributed to the development of Iberdrola's scalable Innovation Hub.

MainJobs — January 2026 - January 2026
Modern Angular Trainer · Madrid, Spain · Remote

- Delivered an intensive **Angular 20** training focused on modern features and best practices, including **Zoneless, Signals, templates, forms, and routing**.
- Designed practical, real-world exercises to help the team adopt more modern, efficient, and maintainable Angular development practices.

Evolutio Cloud S.A — January 2023 - January 2024
Senior Full Stack Developer · Madrid, Spain · Hybrid

- Developed a post-call analysis product for call centers and a reusable component library to standardize UI across multiple projects.
- Reused and standardized components across projects, improving visual consistency, maintainability, and development efficiency.

Moontech — February 2021 - December 2023
Senior Full Stack Developer · Saragossa, Spain · Presential

- Developed software solutions for industrial processes, including complex production workflows and multi-brand AGV systems.
- Designed an Angular component library and an Ionic mobile app for NFC-based AGV configuration, reducing development effort and enabling mobile management.

Indra December 2017 - February 2021

Frontend Angular Developer · Ciudad Real, Spain · Presential

- Developed and maintained critical healthcare applications for public organizations including SERMAS and SERGAS, covering vaccination and telemedicine solutions.
- Contributed to mobile and healthcare applications such as Madrid's Virtual Health Card and tailored solutions for private clinics.

Projects

DDR NG https://github.com/DiscoDurodeRoer/ddr-ng

Open-source Angular component library designed to build reusable, consistent, and maintainable user interfaces.

Tutorías Disco Duro de Roer https://tutorias.discoduroderoer.es

Mentoring platform for managing classes, students, and payments, built using my own Angular component library.

Disco Duro de Roer

Create programming content through a technical blog and YouTube channel, sharing tutorials, practical examples, and software development resources.

Udemy https://www.udemy.com/user/discoduroderoer

Create complete, hands-on programming courses focused on learning through practical projects and building real-world applications.
